The #PolygonImpact Incubator   (a pilot)

Changing the world, one start-up at a time

Impact Plus and Polygon Labs are excited to announce the launch of our upcoming social and environmental impact incubator, the first of its kind on the #Polygon network.

Our upcoming four-month incubator is specifically designed for start-ups in the social and environmental space for blockchain. Our programme can help where resources such as mentoring, networking opportunities, and funding, or best practices from the field of international development, such as Monitoring, Evaluation, Accountability and Learning methodologies are scarce. The programme is tailored to the unique challenges faced by start-ups in this space, particularly those from the global south, who have limited access to resources and networks.

At Impact Plus, we leverage our experience in international development to provide the necessary support for start-ups to succeed and create a positive impact. Our team has extensive experience working with communities around the world and we understand the importance of developing solutions that are locally led, culturally appropriate, properly evaluated, and that respect the values and beliefs of the communities we serve.

The incubator will begin with a pilot program for 12-15 start-ups to minimize risk and reduce barriers to entry. By starting small, we can refine our model and better understand the needs of start-ups in the industry, ensuring that our incubator is effective before scaling up. Through this pilot programme, we will gather data and feedback to refine our approach and provide start-ups with the best possible chance of success. Join us in our mission to create a better world through blockchain technology.

Impact Plus' mission is to spread blockchain-centric solutions in the field of international development to solve fundamental societal problems.
